

Yeruva Padmavathi

Hyderabad, India — 9177608974 — yeruvapadmavathi125@gmail.com

LinkedIn — GitHub — LeetCode — CodeChef

Career Profile

B.Tech Artificial Intelligence and Machine Learning student with hands-on experience in Python, data analysis, predictive modeling, experiment tracking, and database-backed applications. Built projects focused on real-world problem solving, automation, and intelligent decision systems. Seeking software development, AI/ML, and technical internship opportunities.

Education

Vignan Foundation for Science, Technology and Research

2024–2028

B.Tech in Artificial Intelligence and Machine Learning

CGPA: 8.14/10

Deshmuki, Hyderabad, India

12th: 97.5% — 10th: 92%

Technical Skills

Programming: Python, Java, OOP

Libraries/Frameworks: NumPy, Pandas, Matplotlib, OpenCV

Database: SQL

Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Tableau, MLflow

Projects

Revenue Rescue – AI-Powered Payment Failure Recovery System

Individual Project

Python, Pandas, MLflow, SQL

- Developed an intelligent payment recovery system that analyzes failed transactions and predicts recovery probability.
- Implemented failure analysis and a Next Best Action engine with retry, payment link, alternate method, reminder, human review, and stop strategies.
- Built safety checks and a recovery simulator to prevent unsafe retries and estimate potential revenue recovery.

House Price Prediction Web Application

Python, Flask, Pandas, NumPy, MySQL

- Developed a house price prediction application using Linear Regression and property-related features.
- Implemented MySQL prediction history, dashboard statistics, and downloadable PDF reports.

Emergency Blood Donor Finder

Individual Project

Python, Flask, HTML, CSS, JavaScript, MySQL

- Developing a web platform to help users find potential blood donors based on blood group and location during emergencies.
- Implementing donor availability, blood-group search, location filtering, and emergency donor coordination features.

Loan Approval Prediction with MLflow

Python, Pandas, MLflow, Git

- Built a Random Forest classifier to predict loan approval using income, loan amount, credit history, age, and applicant information.
- Integrated MLflow to track experiments, parameters, and model evaluation results.

Certifications

- Python 101 for Data Science – IBM / Cognitive Class, June 2025
- SQL and Relational Databases 101 – IBM Skills Network / Cognitive Class, June 2026
- Data Visualization: Empowering Business with Effective Insights – Forage, July 2026
- QuizOff 2026 – India's Biggest AI Quiz – Unstop, July 2026

Achievements & Activities

- Participated in a college hackathon involving collaborative problem solving and rapid project development.
- Participated in coding competitions to strengthen programming and problem-solving skills.
- Attended an Artificial Intelligence and Machine Learning workshop.

Interests

Artificial Intelligence — Generative AI — Software Development
